The following is an inventory of material recovered from dead storage in the Museum of Modern Art Library in February 1989 and October 1994. Handwritten notes on several of the items suggest that this material was collected by the Film Library.

These documents consist of press releases, handbills, heralds, exhibition schedules, program notes and occasional reports. They deal largely with the League-sponsored film screenings and educational projects, rather than with its film production activities.

This collection does not contain production records, such as scripts and so forth.
