

Create connections at MoMA

**The Museum of Modern Art
Young Learners**

School programs themes

Use MoMA's collection to explore broad themes that link art to classroom learning—no matter what subject you teach.

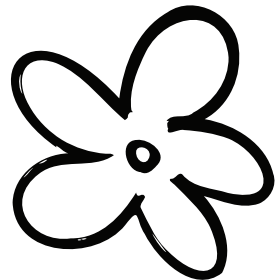

How to select a theme

Consider:

- What are the goals for your visit?
- How can MoMA's collection support your teaching?
- What connections can your students make?

You know your students and curriculum best, so choose a theme most suitable for your needs. Our Learning Specialists will contact you to refine the goals of your tour.

Not sure which tour is right for you? MoMA staff are happy to help you choose the right one. Contact schoolprograms@moma.org with any questions.

Explore themes like “Identity,” “Art and Society,” and “Spaces and Places” to enrich students’ understanding of **history, social studies, and civics**. By examining art through these lenses, students can discover how art reflects and shapes individual identities and societal issues, making connections between classroom learning and real-world contexts and diverse perspectives.

English Language Arts teachers might find it beneficial to explore themes like “Characters” and “Narrative in Art” to boost storytelling and literacy skills. These tours promote creative thinking and critical analysis, helping students draw connections between visual and written narratives. By examining how stories unfold in artworks, students can deepen their understanding of narrative structures and character development.

Art teachers might consider themes like “Investigating Abstraction” and “Materials and Process” to help students grasp various techniques and artistic processes. A MoMA school visit could enhance students’ technical skills and deepen their understanding of art by exploring how artists convey meaning through form, color, and composition, as well as by learning about diverse materials and innovative methods.

more**

MoMA themes

Kindergarten–5th Grade

Investigating Abstraction

Explore how artists use line, shape, and color to create abstract art.

Characters

Explore how artists depict figures and search for visual and situational clues that can help you understand others' feelings and perspectives.

Spaces and Places

Investigate how artists depict places in their art.

Everyday Objects

Take a closer look at how artists use, depict, or transform ordinary objects in artwork.

Museums and Collecting: How MoMA Works

Get a behind-the-scenes look at how MoMA operates and the decisions behind what we see and experience in the galleries.

6th–12th Grade

Materials and Process

Learn how different art materials and techniques create various visual effects and explore new ways artists use them.

Art and Society

Delve into artworks by considering their historical and cultural context, exploring diverse viewpoints, and reflecting on your own ideas and perspectives.

Identity

Explore the different ways identity can be portrayed in art, encompassing community, personal connections, and self-expression.

Narrative in Art

Uncover the storytelling, language, symbolism, and poetry found in art, or discover how literature and text influence art and vice versa!

Critique the Museum

What makes up MoMA's collection? What art should be here? What is missing? Understand the influence of the Museum's choices on visitor experiences and consider what you would do.
